-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office action is responsive to communication received 08/11/2005 –
Amendment and Election.

Claims 1-9 and 13-20 have been cancelled, as directed.

Applicant's election without traverse of the embodiment of Figure 5 in the reply
filed on 08/11/2005 is acknowledged.

Following is an action on the MERITS:

Claim Rejections - 35 USC § 102 and 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that
form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public
use or on sale in this country, more than one year prior to the date of application for patent in the United
States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set
forth in section 102 of this title, if the differences between the subject matter sought to be patented and
the prior art are such that the subject matter as a whole would have been obvious at the time the
invention was made to a person having ordinary skill in the art to which said subject matter pertains.
Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Lyons. Note
visual barrier (16) releasably attachable to at least one support arm (52, 54).

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lyons in
view of Schwartz. Lyons lacks a hole and pin arrangement for releasably installing the
visual barrier. Schwartz shows it to be old in the art to mount a plate member (49) to a
pair of vertical supports (24) by using a combination of holes and pins. Here, the tube

Art Unit: 3711

(26) in Schwartz may be equated to the barrier end (318) of the instant invention.

Moreover, plate (49) in Schwartz may be likened to visual barrier panel (310) of the instant invention. While Schwartz is not concerned with a game table, Schwartz is relevant insofar as the teachings presented for releasably mounting a plate member on a vertical post assembly. In view of the patent to Schwartz, it would have been obvious to modify the device in the cited art reference to Lyons by attaching the transparent screen (16) to the uprights (52, 54) through the use of pins and holes, the motivation being to simply take advantage of another mechanical expedient for vertically supporting the transparent screen.

Allowable Subject Matter

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Further prior art of interest

Note panel (14) in Lundstrom. Dennison shows a game table, of interest.

Erickson shows a plurality of barriers, of interest.
